06035040500	59.8	-13.0	35	https://cacensusfactsheets.online/i6bp

SRR = Self-Response Rate

* "Hardest-to-count" census tracts have CA-HTC Index >= 57

Fact sheet URL's are hyperlinked and should open in a browser when clicked.

All listed tracts have an estimated population greater than 0. Also, some area's self-response rates may reflect the suspension of the Census Bureau's Update Leave operation. Self-response rates do not reflect Group Quarter (GQ) or Nonresponse Followup (NRFU) enumeration. Changes in U.S. Census Bureau geography and methodology prevent an exact comparison between 2020 and 2010 response rates. With that in mind:

"Red" tracts have a cumulative SRR less than 80 percent of the tract's calculated final 2010 self-response rate.

"Yellow" tracts have a cumulative SRR 80%-100% of the tract's calculated final 2010 self-response rate.

"Green" tracts have a cumulative SRR >= 100% of the tract's calculated final 2010 self-response rate.

Note: Some census tracts lack a final 2010 SRR.

For a detailed map of California census tract self-response rates, go to census.ca.gov.

Data sources: U.S. Census Bureau self-response rate, 2019 Planning Database, American Community Survey, 2014-2018 (5-year).

Geography Note: Census tracts do not cross county boundaries but a tract may be divided by city, district, and other boundaries. Also, the same tract number may be used in more than one county.
